Edit and Pretorian Technologies are proud to jointly present the entire range of assistive technology products from Pretorian Technologies in Southern Africa through Edit's leading distribution network and training provision.

Introducing Edit

Since 1991, it has been our vision to upskill people of all abilities so that they can live a life of dignity, self-worth and happiness. We believe that this is only possible through high quality education. We aim to promote inclusivity, independence and employment to allow everybody to make a meaningful contribution towards a better Africa. The Edit team is proud and honoured to be part of this journey.

We aim to find alternative, cutting-edge ways to improve teaching and learning in the education sector and to provide services to educators, education departments, corporate social investors, parents, and other government departments and corporate managers. We have a long tradition of innovation and have always been on the cutting edge of technological advances in education. Through on-going support and professional development, we can help find the right solution for your particular needs.

Schools are supported with on-going technical support and training (see next page) as part of the package. Edit provides online and remote support to teachers in their classrooms and our dedicated team of educational specialists ensure that you always get the most appropriate solution for every child's needs.

Edit has won numerous awards both local and international, more details of which can be found at the back of this brochure.

We are delighted to work closely with Pretorian Technologies and to present their products to the Southern African market. The partnership between Edit and Pretorian continues to go from strength to strength and we very much hope that you will find the contents of this brochure informative and useful.

Introducing Pretorian Technologies

Pretorian Technologies is one of the world's leading suppliers of assistive technology products. Our range is the most comprehensive and extensive of any manufacturer and continues to grow in both breadth and scope.

Our team at Pretorian Technologies takes immense pride in our desire to use our skills to help those less fortunate than ourselves and who need a little extra help to achieve the things the rest of us take for granted. Our mission is to provide those people with that help, and in turn, to empower them to get the most from life. We do this by continually innovating and listening to our market for what adaptations users need to enable them to lead fulfilling lives.

Our ability to introduce so many new products is due to a number of factors. Firstly, all our products are designed entirely in-house. This allows us to react very quickly to emerging needs as the industry moves forward. Secondly, we manufacture all our products in-house too, allowing us strict control of quality via our ISO2001:2015 certification and allowing us to offer the shortest lead-times in the industry, coupled with 100% on-time delivery.

But the main reason we are able to do all of this is that we are passionate about what we do. When we say that our products are 'inspired by you', we really mean it. We delight in creating products that change the life of somebody who needs a little extra help and we know from the many letters and emails we receive that our products really do change lives.

Working with Edit has been a coming together of liked minded people and our shared values make our partnership highly effective. We enjoy taking part in Edit's many training events throughout Southern Africa and you will often see us take the podium ourselves simply because we love taking part.

Dave Gilbert

Managing Director
Pretorian Technologies

Training and Professional Development

Pretorian Technologies is delighted to announce that Edit has been appointed the official training provider for Pretorian products throughout Sub-Saharan Africa.

Both of our companies believe that professional training and personal development for all products means that you will get better use out of them and your students, staff and children will receive greater benefit in the long term.

Our training means that you will:

- Understand the full capability of your learning technology.
- Get the most out of our products.
- Ensure the sustainable use of and long-term benefit from using a Pretorian product.

Edit offers free of charge training and professional development online, through recorded videos or live webinars and face-to-face either at our offices or at your premises. Our online training is a simple alternative to traditional face-to-face training that allows educators to attend short (average 10-30minute) training sessions in the comfort of their own classrooms or homes.
